A Comprehensive

The Schuylkill Learning Academy is committed to meeting the comprehensive needs of the student through a variety of educational and behavioral health services.

Services Include:

- Alternate Education
- Behavioral Intervention
- Day Treatment

Services are offered to students in K -12 grades.

A Comprehensive Learning Center

Alternate Education:

The Schuylkill Learning Academy provides services to students in grades K-12. The student's academic needs are met through a variety of educational options such as regular education, itinerant emotional support or full-time emotional support. Education at the elementary level is individualized based on the student's grade and instructional level. Secondary students will receive their education via a Blended Schools Program with the support of regular education teachers and an itinerant teacher for those students with an Individualized Education Plan (IEP). Secondary students can also be educated in a full-time emotional support classroom through their IEP. This process allows teachers to individualize instruction for all students at their current grade level, needs, and specific course assignment.

Counseling:

The Schuylkill Learning Academy provides two levels of counseling support from the least to most intensive:

Behavioral Intervention: Behavioral Management support in the classroom and daily group activities.

Day Treatment Services:

We provide individual, family, and group counseling in addition to behavioral support. All students in this program will be enrolled in the Schuylkill County Children & Youth Program.

The Schuylkill Learning Academy's success is built upon a cooperative working relationship with the family as we strive together to improve the overall health and well-being of our students.
